Stomacare ProtectorMax

The Stomacare ProtectorMax offers the Ostomate, during daily and leisure activities (e.g. at work, during driving, sports, etc.) additional protection against inconveniences and risks of pressure, bumps or unintended force effects on the stoma.

The Stomacare ProtectorMax offers:

- Maximized Protection:** the use of the ProtectorMax reduces the risk of entrapment of the stoma pouch, for example at night - especially for abdominal sleepers, during intimate moments or when wearing tight clothing, belts, etc.
- Maximized Comfort:** the ProtectorMax offers discretion by covering the stoma and - thanks to its light grey colour - is virtually invisible, even under light-colored clothing.
- Maximized Compliance:** the ProtectorMax is available in a universal size. The included adjustable elastic waistband provides support and keeps the ProtectorMax in place which eliminates the need for a belt.

Size chart ProtectorMax

Art. no.	Unit	Size	Abdominal Circumference
CG300	each	universal	70 - 140 cm / 27" - 55"

Specifications

14 cm
5.5"

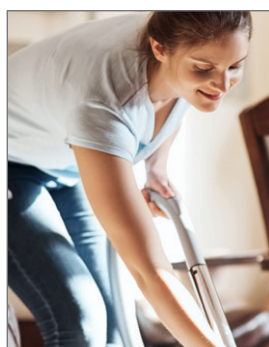

11 cm
4.3"
