P.E.A.care 2.0 Static Quick Release

For the treatment of clubfoot with babies and toddlers Basko Healthcare provides orthotic components such as the P.E.A.care 2.0 splint and Clubycare boots. This combination in particular is used in the treatment of clubfoot according to the Dr. Ponseti method.

Features

- Quick Release mechanism provides easy donning and doffing of the boots
- Adjustable splint width
- Adjustable rotation angle setting (0° to 80°)
- Adjustable dorsiflexion (0° to 20°)
- Combinable with Clubycare boots
- Weight: 210 - 220 gram
- Material: durable XF Plastic

Indications

- Arthrogryposis multiplex congenita (ICD10: Q74.3)
- Pes equinovarus congenitus (ICD10: Q66.0)

Size chart - Static Quick Release

Art. no. "Static Quick Release"	Size	Splint width	Shoulder width
2850-1	1	195 - 275 mm	240 - 320 mm
2850-2	2	230 - 345 mm	280 - 390 mm

Measurement: The appropriate size is determined by the shoulder width.

Clubycare Boots

For the treatment of clubfoot with babies and toddlers according to the Dr. Ponseti method. Clubycare boots are made of soft leather and offer high comfort, tolerance and user compliance. The soles of the boots are easy to screw on to the foot plates of the P.E.A.care 2.0 splint. Clubycare boots are available with or without abduction in different sizes. The latter one comes either with lace closure or with velcro closure.

Features

- Available with lace or velcro closure (905 - series)
- Padded and increased calcaneal cupping
- Open heel construction
- Open toe construction
- unit of measurement: **per piece**
- Elongated heel strap (stitched markers, unstretchable)
- Works perfectly in conjunction with P.E.A.care 2.0 splint
- Material: nappa leather; sole: rubber; lace: cotton; padding: EVA-foam

Indications

- Arthrogryposis multiplex congenita (ICD10: Q74.3)
- Pes equinovarus congenitus (ICD10: Q66.0)
